EDUCATION

The University of Texas at Austin, McCombs School of Business

Expected May 2028

Bachelor of Business Administration in Finance

Coursework: Valuation, Investment Management, Intermediate Accounting, Business Analytics, Statistics

EXPERIENCE

Chegg, Inc. - Austin, TX

May 2026 - Present

Growth & Product Intern

Leads user-generated and scaled-content work, defining production priorities and growth experiments for student-facing products.

- Builds content-intelligence workflows and prototypes voice-agent experiences with defined requirements, fallback behavior, and evaluation cases.

Confidential B2B manufacturer - Remote

May 2026 - Present

SEO & Digital Marketing Analytics Intern

Builds GA4 and Search Console baselines and turns search, site, and messaging data into recurring decision support.

- Reviews launch-site traffic, query performance, engagement, and user-flow diagnostics without disclosing company-identifying details or private outcomes.

Void Agency - Austin, TX

Jan 2026 - Present

Founder

Founded a technical SEO and web-systems agency and reports \$50K+ in collected revenue; private invoices are not public.

- Built Atlas, a Python and SQLite audit system that crawls websites, maps internal links, classifies pages, flags technical issues, and exports structured reports.
- Turns crawl, metadata, schema, performance, and AI-search findings into prioritized implementation roadmaps for SMB clients.

Jon Brumley Texas Venture Labs - Austin, TX

Sep 2025 - Present

Student Associate

Builds market, pricing, and financial models for early-stage companies and supports founder decision-making.

- Synthesizes research into investor-style recommendations covering customer discovery, competitive positioning, unit economics, and go-to-market strategy.

AI Visual Infrastructure Venture - Remote

Jan 2025 - Sep 2025

Co-Founder

Co-founded an AI visual-services venture and reports \$100K in collected revenue; private transaction records are not public.

- Evaluated model-quality tradeoffs, creator workflows, pricing logic, and visual-asset positioning for AI-enabled creative services.

CURRENT RESEARCH WORK

Growth and synthetic-research content work at Sapien, alongside source-led research on AI systems, infrastructure, and ownership.

SELECTED AWARDS AND LEADERSHIP

OnionDAO Hackathon

Jun 2025

1st Place, Team Lead. Led a three-person team to build PayrollPro, a Solana payroll prototype with confidential transfers, multisig treasury controls, and treasury-risk logic.

No Limit Holdings x Artemis Researchathon

Mar 2026

Crypto Investment Research Prize Winner, Penn Blockchain Conference. Prepared a digital-asset thesis using public token data, valuation logic, market-structure analysis, risk assessment, and execution planning.

Student Government

Mar 2025 - Present

University-Wide Representative. Elected university-wide representative coordinating student input through surveys, town halls, and cross-college outreach.

Texas Blockchain

Sep 2025 - Present

Investment Team Analyst. Researches digital assets and infrastructure protocols for student-run investment discussions.
